

## Simplify your Neighbor List optimization

- Get a colored view of your quad band GSM, multicarrier UMTS or CDMA cell sites in **MapInfo**
- Find problematic relationships such as missing neighbors, missing reciprocity or too many neighbors than allowed or needed
- Save 90% of your Neighbor list and Scrambling Code management time using our **MapInfo** based visual tool

### Data Import freedom

- Import from TXT or CSV files
- Choose sector color for each carrier or GSM band
- No data column naming restrictions
- User friendly database import

### Export Your Changes

- Export all added-deleted neighbors and SC to CSV file
- Enjoy MapInfo powerful capabilities

### 1 - Click on sector to get all info

Neighbours List for 2G-900 -- 130514\*943 G0

Site*Sector	Sector#	2G-N	3G-N	BCCH	BSIC	Dist(km)	Azimuth	AntH(m)	E/Tilt	M/Tilt
2G-900										
130626*6554	.....G0	.....7	.....3							
130681*7037	.....G0	.....8	.....5							
130041*11341	.....G1	.....18	.....21							
130199*62666	.....G0	.....13	.....5							
130252*62678	.....G0	.....8	.....5							
130041*1341	.....G0	.....28	.....20							

**Source Info**

RFSiteID: 130,514

Sector: G0

Azimuth: 260

Longitude: 7.9999

- Tons of info when you click on a sector. Manage your neighbor list and Scrambling Codes right on spot and export with one click
- Count neighbors not only for selected cell but also its neighbors

### It's easy to Get Started

- ➔ Take our Online Video Tour. A 5-min overview on how RFVisual works
- ➔ Sign up for a Demo. See RFVisual in action. Download demo version.
- ➔ [www.rfvisual.com/demo.php](http://www.rfvisual.com/demo.php)

### Analyze Scrambling Code

- Scrambling Code Management
- Show duplicates within Radius
- Change Scrambling Codes
- Show available SC within radius
- See SC conflicts visually
- Export SC changes to CSV format

### Added Benefits

- ➔ Free to try and preview
- ➔ Demo database
- ➔ Free Software updates for one year
- ➔ Compatible with all RFV versions
- ➔ Tool can be leased
- ➔ 24/7 Support
- ➔ Hire our engineers if needed
